TAKE ACTION TO PREVENT THE SPREAD OF COVID-19

As part of the Loyola University New Orleans community, we are all committed to acting for and with others to help keep our campus safe. If you are feeling any symptoms of COVID-19, or if you are exposed to someone who tests positive for coronavirus, it is important that you take action to prevent the spread of the virus. Please follow these steps to monitor and report your situation. Your identifying and medical information will be kept confidential.

ASSESS YOUR SYMPTOMS DAILY

Complete the [#CampusClear](#) daily health assessment every day, including weekends, to monitor for symptoms. You should check for any of the following new and unexplained symptoms commonly associated with COVID-19:

- Fever (100.4 degrees F or higher)
- Chills
- Cough
- Shortness of breath
- Loss of taste or smell
- Sore throat
- Congestion or runny nose (excluding seasonal allergies)
- Unexplained fatigue
- Muscle and body aches (unrelated to exercise)
- Headache (excluding migraines)
- Nausea or vomiting
- Diarrhea

If you feel any symptoms, the app will not clear you to come to campus for the day. Follow the instructions on the screen.

REPORT ILLNESSES WHILE AT WORK

If you are experiencing one or more of the symptoms of COVID-19 while you are already on campus, [distance yourself from others immediately](#) and [consult with your physician or call the Ochsner Help Line](#) for medical guidance. You should inform your Supervisor/Chair that you will be leaving the office for the day, just as you would for other sick leave.

REPORT POTENTIAL EXPOSURE

If you or someone with whom you have had close contact tests positive for COVID-19 or is demonstrating the symptoms of COVID-19, please [report it using the #CampusClear daily health assessment](#). Consult with your health care provider or call the [Ochsner COVID Info Help Line](#) for medical guidance.

GET TESTED FOR COVID-19

If you believe you have been exposed to someone with COVID-19 or exhibit any symptoms associated with the virus, we recommend that you get tested. [Community testing is available at various testing sites in New Orleans and at Ochsner Urgent Care locations.](#)

TESTING POSITIVE FOR COVID-19

If you test positive for COVID-19, you will not be cleared to come to campus. Contact our Public Health Coordinator and notify your Supervisor/Chair that you won't be on campus. Contact your physician or call the Ochsner Help Line for medical advice. Requirements for returning to work after a positive test result will be updated based on CDC guidelines at the time of diagnosis. Currently, the CDC guidance for mild to moderate cases of COVID-19 requires the following:

- 10 days since symptoms first appeared and
- 24 hours with no fever without the use of fever-reducing medications and
- Other symptoms of COVID-19 are improving*

Severe cases of COVID-19 (those hospitalized) require different return to work requirements and will be handled on a case by case basis.

CONTACT TRACING

Contact tracing for the Loyola community will be done by our Public Health Coordinator, with the support of a team of trained student workers to coordinate tracing efforts. After confirmed exposure or a positive test result, please report it using the [#CampusClear](#) app. A contact tracer will follow-up with you to determine who you may have come into contact with on campus and to alert other campus community members as needed, while protecting individual privacy.

*Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation
