TAKE ACTION TO PREVENT THE SPREAD OF COVID-19

As part of the Loyola University New Orleans community, we are all committed to acting for and with others to help keep our campus safe. That's the Wolf Pack way.

If you are feeling any symptoms of COVID-19, or if you are exposed to someone who tests positive for coronavirus, it is important that you stay home and take action to prevent the spread of the virus.

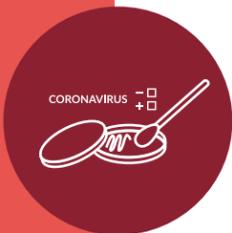

STUDENT HEALTH SERVICES IS HERE TO HELP YOU!

ASSESS YOUR SYMPTOMS DAILY

Use the [#CampusClear](#) daily self-screening app to monitor and report your symptoms. You should check for any of these symptoms commonly associated with COVID-19:

- Fever (100.4 degree F or higher)
- New cough
- Shortness of breath
- Congestion or runny nose
- Chills
- New unexplained fatigue
- Muscle pains
- Headache
- Sore throat
- Nausea or vomiting
- Diarrhea
- New loss of smell or taste

CALL A MEDICAL PROFESSIONAL

If you're feeling any symptoms, call [Student Health Services \(SHS\)](#) during business hours for a telehealth consultation with a health care provider. For after-hours consultations, call the Ochsner COVID 24/7 Help Line at 844.888.2772.

GET TESTED FOR COVID-19

Your health care provider will determine if a COVID test is recommended. [You can get a COVID test at the Student Health Clinic by appointment during business hours.](#) If it's after hours, the clinician will direct you to a nearby testing location. While waiting for the results, resident students will quarantine in designated "awaiting test results" rooms. All other students should quarantine at home.

ENACT YOUR COVID POSITIVE PLAN

If you receive a positive COVID-19 test result, please [contact SHS immediately to enact your COVID Positive Plan and isolate safely.](#) Call SHS during business hours, or email SHS if it's after hours. Residential students who find out about positive test results after SHS is closed should call 504.865.3434 ASAP. We ask that all Loyola community members who test positive also email covid@loyno.edu for contact tracing purposes.

COMPLETE MANDATED ISOLATION

Mandated isolation involves remaining in your residence with zero public contact due to a positive COVID-19 test, with or without active symptoms. [If you test positive for COVID-19, you must be in isolation for at least 10 days with respiratory symptoms improving and no fever for 72 hours without the use of fever-reducing medication.](#) SHS will call daily to check on you and determine when you can leave isolation.

REPORT EXPOSURE TO COVID-19

Exposure is defined as spending at least 15 minutes in close contact (less than six feet) with someone who tests positive for COVID-19. If you meet this criteria or receive a contact trace notification from the Louisiana Department of Health, please [call SHS so they can help you quarantine appropriately.](#) Be sure to answer your phone and keep your voicemail cleared in case a contact tracer contacts you.

COMPLETE MANDATED QUARANTINE

Mandated quarantine involves remaining in your residence with limited public contact due to potential exposure to COVID-19. [Quarantine requires a minimum of 14 days of isolation, symptom-free, from the date of exposure.](#) You must be cleared by SHS before you can leave quarantine.
